

Picture match game board

1.

A horizontal number line with integers from 0 to 8. Above each integer, there is a semi-circle. The semi-circles are evenly spaced and extend from the integer to the next integer.

2.

Eight identical triangles arranged in two rows of four. The top row has four triangles, and the bottom row has four triangles. Each triangle is an isosceles triangle with its base at the bottom.

3.

Six identical rectangles arranged in two rows of three. Each rectangle is divided into two equal halves by a vertical line down the center.

4.

Six identical circles arranged in a single row. Each circle has an 'X' drawn inside, formed by two diagonal lines crossing at the center.
