Ma YEAR 7 LEVELS 3-4 2005 Year 7 progress test in mathematics Mark scheme for Paper 1, Paper 2 and Mental mathematics

us Year 7 progress tests Year Year 7 progres Year 7 progress tests v ogres 'ear

department for **education and skills** creating opportunity, releasing potential, achieving excellence

Introduction

The test papers will be marked by external markers. The markers will apply the mark schemes in this booklet, which is provided here to inform teachers.

This booklet contains the mark schemes for Paper 1, Paper 2 and the mental mathematics test. Questions have been named so that each one has a unique identifier.

The structure of the mark schemes

The marking information for questions in the written tests is set out in the form of tables, which start on page 11 (Paper 1) and page 21 (Paper 2) of this booklet. The two columns on the left-hand side of each table provide a quick reference to the question number, question part, and the total number of marks available for that question part.

The Correct response column usually includes two types of information:

- a statement of the requirements for the award of each mark, with an indication of whether credit can be given for correct working, and whether the marks are independent or cumulative
- examples of some different types of correct response, including the most common and the minimum acceptable.

The Additional guidance column indicates alternative acceptable responses, and provides details of specific types of response that are unacceptable. Other guidance, such as when 'follow through' is allowed, is provided as necessary.

Questions with a *Using and applying mathematics* element are identified in the mark scheme by an encircled U with a number that indicates the significance of using and applying mathematics in answering the question. The U number can be any whole number from 1 to the number of marks in the question.

General guidance

Using the mark schemes

Answers that are numerically equivalent or algebraically equivalent are acceptable unless the mark schemes state otherwise.

In order to ensure consistency of marking, the most frequent procedural queries are listed on the following two pages with the prescribed correct action. This is followed by further guidance, relating to marking of questions that involve money, time, algebra, coordinates or negative numbers. Unless otherwise specified in the mark schemes, markers should apply the following guidelines in all cases.

What if ...

The pupil's response does not match closely any of the examples given.	Markers should use their judgement in deciding whether the response corresponds with the statement of requirements given in the Correct response column. Refer also to the Additional guidance column.
The pupil has responded in a non-standard way.	Calculations, formulae and written responses do not have to be set out in any particular format. Pupils may provide evidence in any form as long as its meaning can be understood. Diagrams, symbols or words are acceptable for explanations or for indicating a response. Any correct method of setting out working, however idiosyncratic, is acceptable. Provided there is no ambiguity, condone the continental practice of using a comma for a decimal point.
The pupil has made a conceptual error.	In some questions, a method mark is available provided the pupil has made a computational, rather than conceptual, error. A computational error is a slip such as writing $4 \times 6 = 18$ in an otherwise correct long multiplication. A conceptual error is a more serious misunderstanding of the relevant mathematics; when such an error is seen, no method marks may be awarded. Examples of conceptual errors are: misunderstanding of place value, such as multiplying by 2 rather than 20 when calculating 35×27 ; subtracting the smaller digit from the larger in calculations such as $45 - 26$ to give the answer 21; incorrect signs when working with negative numbers.
The pupil's accuracy is marginal according to the overlay provided.	Overlays can never be 100% accurate. However, provided the answer is within, or touches, the boundaries given, the mark(s) should be awarded.
The pupil's answer correctly follows through from earlier incorrect work.	Follow through marks may be awarded only when specifically stated in the mark schemes, but should not be allowed if the difficulty level of the question has been lowered. Either the correct response or an acceptable follow through response should be marked as correct.
There appears to be a misreading affecting the working.	This is when the pupil misreads the information given in the question and uses different information. If the original intention or difficulty level of the question is not reduced, deduct one mark only. If the original intention or difficulty level is reduced, do not award any marks for the question part.
The correct answer is in the wrong place.	Where a pupil has shown understanding of the question, the mark(s) should be given. In particular, where a word or number response is expected, a pupil may meet the requirement by annotating a graph or labelling a diagram elsewhere in the question.

The final answer is wrong but the correct answer is shown in the working.	Where appropriate, detailed guidance will be given in the mark schemes, and must be adhered to. If no guidance is given, markers will need to examine each case to decide whether:	
	the incorrect answer is due to a transcription error	If so, award the mark.
	in questions not testing accuracy, the correct answer has been given but then rounded or truncated	If so, award the mark.
	the pupil has continued to give redundant extra working which does not contradict work already done	If so, award the mark.
	the pupil has continued, in the same part of the question, to give redundant extra working which does contradict work already done.	If so, do not award the mark. Where a question part carries more than one mark, only the final mark should be withheld.
The pupil's answer is correct but the wrong working is seen.	A correct response should always be marked as correct, unless the mark schemes state otherwise.	
The correct response has been crossed (or rubbed) out and not replaced.	Mark, according to the mark schemes, any legible cross work that has not been replaced.	sed (or rubbed) out
More than one answer is given.	If all answers given are correct or a range of answers is correct, the mark should be awarded unless prohibited If both correct and incorrect responses are given, no m	by the mark schemes.
The answer is correct but, in a later part of the question, the pupil has contradicted this response.	A mark given for one part should not be disallowed for working or answers given in a different part, unless the mark schemes specifically state otherwise.	

Marking specific types of question

Accept 🗸	Do not accept ×
 Any unambiguous indication of the correct amount eg f3.20(p), f3 20, f3,20, 3 pounds 20, f3-20, f3 20 pence, f3:20, f7.00 The f sign is usually already printed in the answer space. Where the pupil writes an answer other than in the answer space, or crosses out the f sign, accept an answer with correct units in pounds and/or pence eg 320p 700p 	 Incorrect or ambiguous use of pound or pence eg £320, £320p or £700p, or 3.20 or 3.20p not in the answer space Incorrect placement of decimal points, spaces, etc or incorrect use or omission of 0 eg £3.2, £3 200, £32 0, £3-2-0, £7.0

Responses involving time A time interval For example: 2 hours 30 mins			
Accept 🗸	Take care ! Do not accept ×		
 ✓ Any unambiguous indication eg 2.5 (hours), 2h 30 ✓ Digital electronic time ie 2:30 	 Incorrect or ambiguous time interval eg 2.3(h), 2.30, 2-30, 2h 3, 2.30min The time unit, hours or minutes, is usually printed in the answer space. Where the pupil writes an answer other than in the answer space, or crosses out the given unit, accept an answer with correct units in hours or minutes, unless the question has asked for a specific unit to be used 		
<i>A specific time</i> For example: 8.40am	17:20		
Accept 🗸	Do not accept x		
 ✓ Any unambiguous, correct indication eg 08.40, 8.40, 8:40, 0840, 8 40, 8-40, twenty to nine, 8,40 ✓ Unambiguous change to 12 or 24 hour clock eg 17:20 as 5:20pm, 17:20pm 	 Incorrect time eg 8.4am, 8.40pm Incorrect placement of separators, spaces, etc or incorrect use or omission of 0 eg 840, 8:4:0, 084, 84 		

Accept ✓	Take care ! Do not accept ×
 ✓ Unambiguous use of a different case or variable eg N used for n x used for n 	! Unconventional notation eg $n \times 2$ or $2 \times n$ or n^2 or $n + n$ for $2n$ $n \times n$ for n^2 $n \div 2$ for $\frac{n}{2}$ or $\frac{1}{2}n$ 2 + 1n for $2 + n2 + 0n$ for $2Within a question that demandssimplification, do not accept as partof a final answer involving algebraAccept within a method whenawarding partial credit, or withinan explanation or general working* Embedded values given when solvingequationseg in solving 3x + 2 = 32,3 \times 10 + 2 = 32 for x = 10To avoid penalising the two types oferror below more than once withineach question, do not award the markfor the first occurrence of each typewithin each question. Where a questi-part carries more than one mark, onlythe final mark should be withheld$
✓ Words used to precede or follow equations or expressions eg $t = n + 2$ tiles or tiles = $t = n + 2$ for $t = n + 2$	 Words or units used within equations or expressions eg n tiles + 2 n cm + 2 Do not accept on their own Ignore if accompanying an acceptable response
✓ Unambiguous letters used to indicate expressions eg $t = n + 2$ for $n + 2$	* Ambiguous letters used to indicate expressions eg $n = n + 2$ for $n + 2$

Responses involving coordinates For example: (5, 7)		
Accept 🗸	Do not accept ×	
✓ Unconventional notation eg (05, 07) (five, seven) $\begin{pmatrix} x & y \\ (5, 7) \\ (x = 5, y = 7) \end{pmatrix}$	* Incorrect or ambiguous notation eg (7, 5) y x (7, 5) (5x, 7y) (5 ^x , 7 ^y) (x - 5, y - 7)	

For example: -2		
Accept ✓	Do not accept ×	
	To avoid penalising the error below mor than once within each question, do not award the mark for the <i>first</i> occurrence of the error within each question. Where a question part carries more than one mark, only the final mark should be withheld * Incorrect notation eg 2-	

Recording marks awarded on the test paper

All questions, even those not attempted by the pupil, will be marked with a 1 or a 0 entered in each marking space. Where 2m can be split into 1m gained and 1m lost, with no explicit order, then this will be recorded by the marker as 1 0

The total marks awarded for a double page will be written in the box at the bottom of the right-hand page, and the total number of marks obtained on the paper will be recorded on the front of the test paper.

A total of 100 marks is available (40 from Paper 1, 40 from Paper 2 and 20 from the mental mathematics test).

Awarding levels

The sum of the marks gained on Paper 1, Paper 2 and the mental mathematics paper determines the level awarded. Level threshold tables, which show the mark ranges for the award of different levels, will be available on the QCA website *www.qca.org.uk* from 20 June 2005. QCA will also send a copy to each school by 1 July 2005.

Schools will be notified of pupils' results by means of a marksheet, which will be returned to schools by the external marking agency with the pupils' marked scripts. The marksheet will include pupils' scores on the test papers and the levels awarded.

BLANK PAGE

Mark scheme for Paper 1

Question	Making models		
1		Correct response	Additional guidance
	1m	12	

Question			Working out
2		Correct response	Additional guidance
	1m	27	
	1m	26	

Question	stion Same val		
3		Correct response	Additional guidance
а	1m	Indicates Yes and gives a correct explanation The most common correct explanations:	
		Complete the calculations eg 17 + 15 = 32 and 2 × 16 = 32 They are both 32 10 + 10 = 20, 7 + 5 = 12 and 2 × 10 = 20, 2 × 6 = 12	 ✓ Minimally acceptable explanation eg • 32 seen, with no evidence of incorrect working • 20 + 12 and 20 + 12 ★ Incomplete explanation eg • 17 + 15 = 2 × 16 • Same answer • I did the calculations
		 Use knowledge of near doubles eg Subtract 1 from 17 and add it to the 15 and you have 16 + 16 which is the same as 16 × 2 Double 15 = 30 then add 2 and it's the same as double 16 	 ✓ Minimally acceptable explanation eg • 16 + 1 + 16 - 1 = 2 × 16 • 17 + 15 = 16 + 16 ✓ Incomplete explanation eg • 17 + 15 = 2 × 16
b	1m	17	
С	1m	3	! Answer of 3 × 1 Condone

Question			Coins
4		Correct response	Additional guidance
	2m	57 p	
	or 1m	Shows the digits 57 or Shows the digits 105 and 48 or	
		 Shows the digits 1(00) and 43 with no evidence of an incorrect method or incorrect units or Shows a complete correct method with not more than one error eg 100 - 48 + 5 £1.05 - 38p (error) = 67 	 For 1m, units incorrect or inconsistent Condone provided no ambiguity between pounds and pence is caused eg, for 1m accept 1 - 48 = 42 (error) [attempt is 100 - 48] 42 + 5 = 47 eg, for 1m do not accept 1 - 48 = 47 (error) [attempt is 48 - 1]

Question			Beanbag
5		Correct response	Additional guidance
а	1m	Indicates only the correct beanbag, ie	 Other beanbags indicated Ignore marks made on any beanbags inside the 100cm circle as these may have been used for part (b) Do not accept any other beanbags indicated
b	1m	8	
с	1m (U1)	6	

Question			Decimals
6		Correct response	Additional guidance
а	1m	Gives any pair of decimal numbers that add to 1 other than those given eg 0.1 0.9 0.5 0.5 0.75 0.25 1.2 -0.2	* Whole numbers or fractions eg • 1.0 0.0 • $\frac{1}{4}$ $\frac{3}{4}$ * Given pair in reverse order eg • 0.7 0.3
b	1m	0.15 or equivalent decimal	★ Equivalent fractions

Question			One line
7		Correct response	Additional guidance
	1m	Indicates one more square so the first shape has one line of symmetry, ie indicates one of the four black squares shown below	! Square not shaded Accept provided the indication is unambiguous
	1m	Indicates one more square so the second shape has one line of symmetry, ie	! <i>Line(s) of symmetry drawn</i> Ignore, even if incorrect

Question			Cost of pens
8		Correct response	Additional guidance
	2m	\pounds 1.30, with no evidence of incorrect working	<pre> × Incorrect working eg • 5 − 1.10 = 4.90 4.90 ÷ 3 = 1.30 </pre>
	or 1m	Shows the value 1.3 or 130, with no evidence of incorrect working or	
	(U1)	Shows the digits 39(0) or Shows a complete correct method with not more than one computational error, provided their value is rounded or truncated to the nearest penny eg • 5 - 1.10 = 4.90 4.90 ÷ 3 = 1.63	★ Conceptual error eg • 5 - 1.10 = 4.10 4.10 ÷ 3 = 1.37

Question			Completing calculations
9		Correct response	Additional guidance
	1m	Gives any three numbers that combine as shown to give 60 eg • 100 + 20 - 60 • 60 + 1 - 1 • 60 + 60 - 60	 ✓ Fractions, decimals or negatives ✓ Zero(s) used
	1m	Gives any three numbers that combine as shown to give 0.6 eg • 0.5 + 0.5 - 0.4 • 2 + 1 - 2.4 • 0.6 + 1 - 1	

Question			Using rules
10		Correct response	Additional guidance
a	1m	Gives both correct numbers in the correct positions, ie 3 and 35	
b	2m or	Gives both correct numbers in the correct positions, ie 5 and 95	
	1m	Gives one correct number in the correct position	

Question	How many		
11		Correct response	Additional guidance
a	1m	10	 ✓ Throughout the question, responses embedded eg, for part (a) • 10 × 4
b	1m	5	! Follow through For part (b), accept follow through as their (a) ÷ 2
c	1m	80	! Follow through For part (c), accept follow through as either their (a) × 8 or their (b) × 16

12	Correct response	Additional guidance
a 1		
b 1	n 6	
c 2		 Symbols not shaded, accurate or grouped in a straight line For 2m or 1m, condone provided the number of symbols is unambiguous for each age 14
6 1	 Completes a dot plot that satisfies at of the following six conditions, even other errors There is a total of 14 dots Age 11 has 3 dots Only age 9 and age 14 have no de Age 13 has the greatest number of Age 12 has more dots than age 14 	least four if there are ots f dots
	6. Age 10 has at least one dot or Shows or implies either set of correct ages, even if the dot plot is incorrect eg (0), 2, 3, 4, 5, (0) (0), 1, 3, 4, 6, (0)	

Question			Keys
13		Correct response	Additional guidance
а	1m	5.3	✓ Equivalent fractions or decimals
b	1m	8.1	 <i>Follow through</i> Accept follow through as their (a) + 2.8, provided this requires 'bridging the units' eg, from their (a) as 6.4 accept • 9.2

Question	•• Angles in a squ		
14		Correct response	Additional guidance
a	1m	90	! Throughout the question, incorrect units inserted Ignore
Ь	1m	45	 Follow through Accept follow through as their (a) ÷ 2 provided 0 < their (a) < 90 Incomplete processing eg • 1/2 of 90

Question	ion Multiplicati		Multiplication
15		Correct response	Additional guidance
	1m	150	
	2m	400	 For 2m or 1m, follow through For 2m, accept a correct evaluation of (250 + their answer to 6 × 25) For 1m, accept a correct method eg, for 1m accept 10 × 25 + their answer to 6 × 25 250 + their answer to 6 × 25
	or 1m	Shows a complete correct method with not more than one computational error eg • $6 \times 25 = 150$ $10 \times 25 = 250$ $16 \times 25 = 150 + 250$ • $16 \times 20 = 320$ $16 \times 5 = 80, 320 + 80$ • $16 \times 100 = 1600$ $1600 \div 2 = 800$ $800 \div 2$ • $\frac{10}{20} \frac{6}{200} \frac{120}{200} \frac{5}{50} \frac{25}{50} \frac{(error)}{25} \frac{200}{200} + 120 + 50 + 25 = 395$ • $\frac{16}{300} \frac{25}{320} \frac{80}{300} \frac{80}{300} \frac{80}{(error)}$	 For 1m, conceptual error eg 16 25 32 80 112 Method is repeated addition For 1m, at least some multiplication must be shown or implied eg, for 1m do not accept 16 + 16 + + 16 [shown 25 times]

Question			Areas
16		Correct response	Additional guidance
а	1m	4	
b	1m	2	✓ Follow through as their (a) \div 2

Question		Pairs of values		
17		Correct response	Additional guidance	
а	1m	Gives two correct pairs of values for <i>x</i> and <i>y</i> that add to 30 eg • <i>x</i> = 10, <i>y</i> = 20 <i>x</i> = 15, <i>y</i> = 15 • <i>x</i> = 1, <i>y</i> = 29 <i>x</i> = 30, <i>y</i> = 0	 ✓ Fractions, decimals or negatives ! Same values repeated, but order reversed As this still gives different values for x and y, condone eg • x = 10, y = 20 x = 20, y = 10 	
b	1m	10	 ★ Incomplete processing eg • 40 - 30 ★ Answer of -10 	

Mark scheme for Paper 2

Question			Number lines
1		Correct response	Additional guidance
а	1m	Indicates the value 26, ie	<pre>! Inaccurate indication Accept provided the pupil's intention is clear ✓ Unambiguous indication eg 20 26 30</pre>
b	1m	105	

Question			Shopping
2		Correct response	Additional guidance
	1m	£ 5.36	

Question			Times
3		Correct response	Additional guidance
а	1m	Completes the missing time correctly eg • 06:45 • 6:45 am	 For the first mark, indication of am unconventional or omitted Condone, but do not accept incorrect times eg, accept 6:45 morning 6:45 eg, do not accept 6:45 pm 18:45
	1m	Completes the missing time correctly eg • 19:15 • 7:15 pm	 For the second mark, indication of pm unconventional or omitted Do not accept any indications other than the 24 hour clock and/or pm eg, accept 19:15pm eg, do not accept 7:15 7:15 in the evening
b	1m	Completes the missing time correctly eg 9pm Nine o'clock at night	 Indication of pm unconventional or omitted Condone any unconventional indication eg, accept 9 o'clock afternoon Accept indication of pm omitted only if this error has already been penalised for the second mark in part (a) Time not interpreted eg 21pm Twenty-one hundred hours

Question			Titles
4		Correct response	Additional guidance
a	1m	10	
b	1m	14	
с	1m	3	

Question		Units
5	Correct response	Additional guidance
a 1m	Indicates No and gives a correct explanation eg = 100cm is 1 metre = 1000cm = 10 metres not 1 metre = 1000cm = 10 metres not 1 metre	 ✓ Minimally acceptable explanation eg • 100 • 1000mm • 10m Explanation uses known measurement(s) Accept provided there is a comparison eg, accept • I would be less than 1 metre tall but I am 1.27 metres tall • The door is 2m high, not 0.2m eg, do not accept • I would be less than a metre tall • The door is not 0.2m high Response contains an incorrect statement Ignore alongside a correct response eg, accept • 100cm = 1m, so 1000cm = 1km eg, do not accept • 1000cm = 1km
b 1m	10	

2005 Year 7 progress mathematics test mark scheme: Paper 2

Question			Rounding
6		Correct response	Additional guidance
	1m	Indicates that the amount was rounded to the nearest hundred pounds eg • Hundred • 100	 ! Units repeated eg • £100 Condone * Ambiguous spelling eg • Hundredth • Hundreth

Question			Shading fractions
7		Correct response	Additional guidance
а	1m	Indicates only the correct shape, ie	
b	1m	Indicates No and gives a correct explanation The most common correct explanations: Show or imply the correct evaluation of both calculations eg • $\frac{1}{2}$ of 20 = 10 and $\frac{1}{4}$ of 40 = 10 • They both equal 10 • 10 10 10 10 10 10 • $\frac{1}{2}$ of 20 = $\frac{1}{4}$ of 40 Use ratio eg • 20 doubled is 40 and half of $\frac{1}{2}$ is $\frac{1}{4}$	 ✓ Minimally acceptable explanation eg 10, 10 seen Equal Same ✓ Incomplete explanation eg 10 seen 1/2 of 20 is 10 1/4 of 40 is 10 ✓ Minimally acceptable explanation eg 20 × 2 = 40, 1/2 ÷ 2 = 1/4 20 is half of 40 and 2 is half of 4 You have doubled the number and halved the fraction eg 1/2 is double 1/4 It's just doubled
	(U1)		

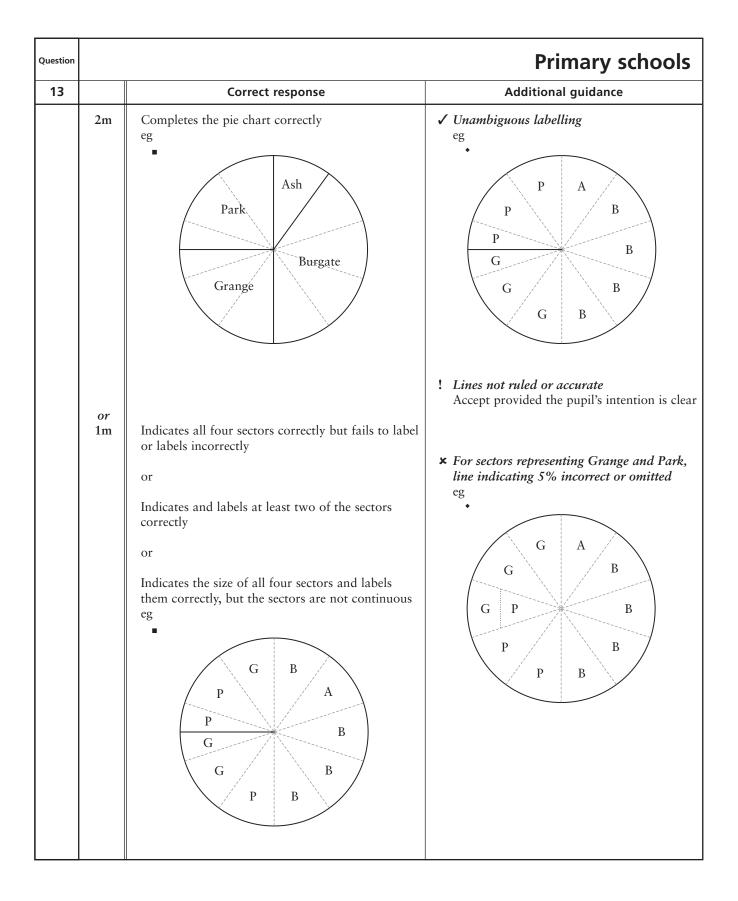

Question	Number line aga		Number line again
8		Correct response	Additional guidance
	1m	-2	
	1m	12	

Question			Place value
9		Correct response	Additional guidance
а	1m	Indicates the correct number, ie 47 407 4007 40007	
b	1m	3 000 000	 Unconventional grouping of digits Accept any groupings provided the digits are correct X Value given in words

Question		Turning direction		
10		Correct response	Additional guidance	
а	1m	West	 ✓ Unambiguous indication eg, for part (a) ◆ W 	
b	1m	South		
с	1m	45	 ✓ -45 ! Angle greater than 360 Accept any multiple of 360 + 45 eg ★ 405 	

Question			Moving on a grid
11		Correct response	Additional guidance
а	1m	(5, 5)	
b	1m	Gives a correct pair of coordinates for a point on the line shown [<i>y</i> = <i>x</i> + 2] eg (0, 2) (2, 4) (3.5, 5.5)	 ✓ Response assumes the line continues as a straight line eg • (8, 10) • (-2, 0) • (x, x + 2)

Question			Multiplying chain
12		Correct response	Additional guidance
	1m	1008	
	1m	24	

2005 Year 7 progress mathematics test mark scheme: Paper 2

27

Question			Thinking fractions
14		Correct response	Additional guidance
а	1m	Indicates No and gives a correct explanation The most common correct explanations:	
		Show or imply the correct sum eg • $\frac{1}{4} + \frac{1}{4} = \frac{2}{8} + \frac{2}{8}$ $= \frac{4}{8}$ • $\frac{1}{4} + \frac{1}{4} = \frac{1}{2}$, but $\frac{2}{8} = \frac{1}{4}$ • $0.25 + 0.25 = 0.5$ and $0.5 = \frac{4}{8}$	✓ Minimally acceptable explanation eg • $\frac{4}{8}$ • $\frac{2}{4}$ • $\frac{1}{2}$ • Half
		Give a correct and comparable calculation that gives $\frac{2}{8}$ eg • $\frac{1}{4} + 0 = \frac{2}{8}$ • $\frac{1}{4} = \frac{2}{8}$ so you can't add another $\frac{1}{4}$ • $\frac{1}{8} + \frac{1}{8} = \frac{2}{8}$	✓ Minimally acceptable explanation eg • $\frac{1}{4} = \frac{2}{8}$
	(U1)	 Address the misconception eg Sam has just added the top numbers together and the bottom numbers together and you can't add fractions like that You don't need to change the bottom number, just add the top ones together 	 ✓ Minimally acceptable explanation eg • He added the top and bottom numbers together • You only add the top numbers [denominator unchanged implied] • You don't add the bottom numbers [numerators added implied] × Incomplete explanation eg • You add the numerators • You keep the denominator the same

Question			Thinking fractions (cont)
14		Correct response	Additional guidance
b	1m	Indicates 5	! Answer repeats fifths Condone eg, accept

Question			Net
15		Correct response	Additional guidance
	1m	Indicates the correct name, ie Cube Prism Square-based pyramid	
		Triangular-based Cuboid pyramid	

Question			Three odds
16		Correct response	Additional guidance
	1m	Indicates No and gives a correct explanation The most common correct explanations:	
		Give a counter example eg • 1 + 3 + 5 = 9, which is odd not even	 ✓ Minimally acceptable explanation eg 1 + 3 + 5 = 9 1 + 3 + 5 = odd 9 Odd numbers taken to be the same Accept, even if the odd number repeated is 3 eg, accept 3 + 3 + 3 = 9 3 × 3 = 9 1 Calculations or statements given that do not relate to the given statement or are incorrect Ignore alongside a correct counter example 1 Incomplete explanation eg 1 + 3 + 5
	<u>U1</u>	 Make a general statement eg An odd + another odd = an even Then even + the third odd = odd So the answer will always be odd Odd numbers are just even numbers plus 1, and even + even + even = even and even + 3 = odd 	 ✓ Minimally acceptable explanation eg • Odd + odd = even, even + odd = odd • Even + even + even + 3 = odd • Odd numbers taken to be the same Condone eg, accept • 3 × odd is odd × odd which always gives odd ✓ Incomplete or incorrect explanation eg • Adding three odd numbers does not make an even number • Odd × odd = odd • When you add all odd numbers it will always come to an odd number

Question			Calculators
17		Correct response	Additional guidance
а	1m	28	
b	1m	24	! Parts (a) and (b) transposed but otherwise correct Mark as 0, 1

Question			158
18		Correct response	Additional guidance
	1m	632	
	<u>U1</u>		

Question			Block of three
19		Correct response	Additional guidance
	2m	40	
	or 1m	Shows or implies correct dimensions for the large rectangle, even if there is further incorrect working eg 12cm by 8cm 12 8 12 4 + 4 + 8 + 4 + 8 + 4 + 8 20 × 2 12 × 8 (= 96)	 ✓ For 1m, minimally acceptable implication eg 4 4 8 4 8 4 • Four 4s and three 8s seen, with the intention to add also shown

Question			Boxes of counters
20		Correct response	Additional guidance
a	1m	 Indicates box A and gives a correct explanation The most common correct explanations: State or imply that there are the same number of white counters in each, but different numbers of black counters or different totals eg There are the same number of white in each box, but in box B there are more black, so you are less likely to get white from box B Both boxes have three white but B has one extra black so there is more chance of picking a black from B There's the same number of whites in both, but in A it's out of a smaller total 	 ✓ Minimally acceptable explanation eg • Same white, fewer black • 3 white, but only one black • 3 white, but more black in B • Same number of white but fewer counters • 3 is out of fewer counters • 3 is out of fewer counters • 3 is out of fewer counters • X Response details the number of white and black counters with no comparison shown or implied eg • A has 3 white and 1 black B has 3 white and 2 black × Incomplete explanation eg • There is the same number of white counters in each box • It's only got one black counter • Fewer black counters in A • There are more black in B • It is out of more counters in B
	(U1)	 Show the probabilities of getting a white counter or a black counter eg The probability of getting a white counter is ³/₄ for box A but ³/₅ for box B For black it's 25% for A and 40% for B 	 Numerical probability unconventionally or incorrectly expressed As this is a level 4 mark, condone even if the comparison is not explicit, provided the correct box is ticked eg, accept A is 3 in 4, B is 3 in 5 3 W to 1 B, 3 W to 2 B For black it's 1 out of 4 and 2 out of 5 X Incomplete explanation eg There's a greater probability of choosing a white counter from box A B is the best box for getting a black counter

Question			Boxes of counters (cont)
20		Correct response	Additional guidance
b	1m	Indicates equal numbers of black and white counters	 Unambiguous indication eg • Filled circle for black, unfilled circle for white Number of black and white counters is zero Accept only if at least one counter clearly labelled with another colour is given Do not accept no counters given Counters clearly labelled with other colours alongside black and white counters Ignore

Question			Flats
21		Correct response	Additional guidance
а	1m	Gives the values 37, 38, 39, 40 in any order	
b	1m	15	
	(U1)		

Now we are ready to start the test.

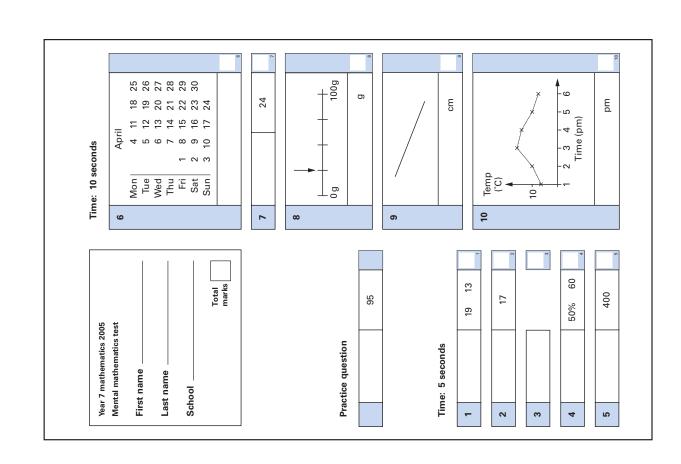

For the first group of questions you will have 5 seconds to work out each answer and write it down.'

-	 Look at the numbers on your answer sheet. Add them.
7	2 Double seventeen.
m	3 How many sides does a hexagon have?
4	4 What is fifty per cent of sixty?
ഹ	5 What is four hundred divided by one hundred?

'For the next group of questions you will have 10 seconds to work out each answer and write it down.'

9	Look at the calendar for the month of April. Alice was born on the twenty-second of the month. On what day was Alice born?
7	What is a quarter of twenty-four?
8	Look at the scale on your answer sheet. What value is the arrow pointing to?
6	9 Estimate the length of the line on your answer sheet in centimetres.
10	10 The line graph shows the temperature during one afternoon. At what time was the highest temperature?

'Now turn over your answer sheet.'

 Look at your answer sheet. It shows the temperature on Monday. On Tuesday, it was ten degrees higher. What was the temperature on Tuesday? What is the next square number after thirty-six? Hour y equals forty-four. Four y equals forty-four. Four y equals forty-four. To The next group of questions you will have 15 seconds to work out each a and write it down.' The bar chart shows pupils are there? The table shows the cost of a pen and a pencil. Ibuy two pens and two pencils. How much does that cost altogether? Look at the sequence of numbers going down in steps of four. Write down the next two numbers in the sequence. The pie chart shows how some pupils travel to school? Cook at the shaded shape drawn on a centimetre square grid. What is its area? 		
 14 What is the next square number after thirty-six? 15 Four <i>y</i> equals forty-four. 16 The next group of questions you will have 15 seconds to work out each a write it down.' 16 The bar chart shows pupils favourite colours. Altogether, how many pupils are there? 17 The table shows the cost of a pen and a pencil. I buy two pens and two pencils. 18 Look at the sequence of numbers going down in steps of four. Write down the next two numbers in the sequence. 19 The pie chart shows how some pupils travel to school? 20 Look at the shaded shape drawn on a centimetre square grid. What is its area? 	13	Look at your answer sheet. It shows the temperature on Monday. On Tuesday, it was ten degrees higher. What was the temperature on Tuesday?
 Four <i>y</i> equals forty-four. What is the value of <i>y</i>? Yer the next group of questions you will have 15 seconds to work out each a and write it down.' The bar chart shows pupils' favourite colours. The table shows the cost of a pen and a pencil. The table shows the cost of a pen and a pencil. The table shows the cost of a pen and a pencil. UN two pens and two pencils. Look at the sequence of numbers going down in steps of four. Write down the next two numbers in the sequence. The pie chart shows how some pupils travel to school. Cook at the shaded shape drawn on a centimetre square grid. 	14	What is the next square number after thirty-six?
 <i>'For the next group of questions you will have 15 seconds to work out each a and write it down.'</i> The bar chart shows pupils favourite colours. Altogether, how many pupils are there? The table shows the cost of a pen and a pencil. The table shows the cost of a pen and a pencil. Ibuy two pens and two pencils. How much does that cost altogether? Look at the sequence of numbers going down in steps of four. Write down the next two numbers in the sequence. The pie chart shows how some pupils travel to school. About what percentage of the pupils cycle to school? Look at the shaded shape drawn on a centimetre square grid. 	15	Four y equals forty-four. What is the value of y ?
	For and	For the next group of questions you will have 15 seconds to work out each answer and write it down.'
	16	The bar chart shows pupils' favourite colours. Altogether, how many pupils are there?
	17	The table shows the cost of a pen and a pencil. I buy two pens and two pencils. How much does that cost altogether?
	18	Look at the sequence of numbers going down in steps of four. Write down the next two numbers in the sequence.
	19	The pie chart shows how some pupils travel to school. About what percentage of the pupils cycle to school?
	20	Look at the shaded shape drawn on a centimetre square grid. What is its area?

Work out the answer to the calculation on your answer sheet.

1

12

There is one litre of water in a jug. Tom pours out two hundred and fifty millilitres of the water. How much water is left in the jug?

'Put your pens down. The test is finished.'
