

Matchstick puzzle 8

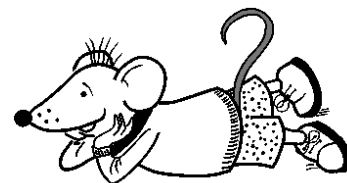

8. Leave 3

Here we have two rows of three squares, made up by using 17 matchsticks.

Can you take 5 matchsticks away so that only three squares are left?

And no odd matchsticks left sticking out anywhere, please!

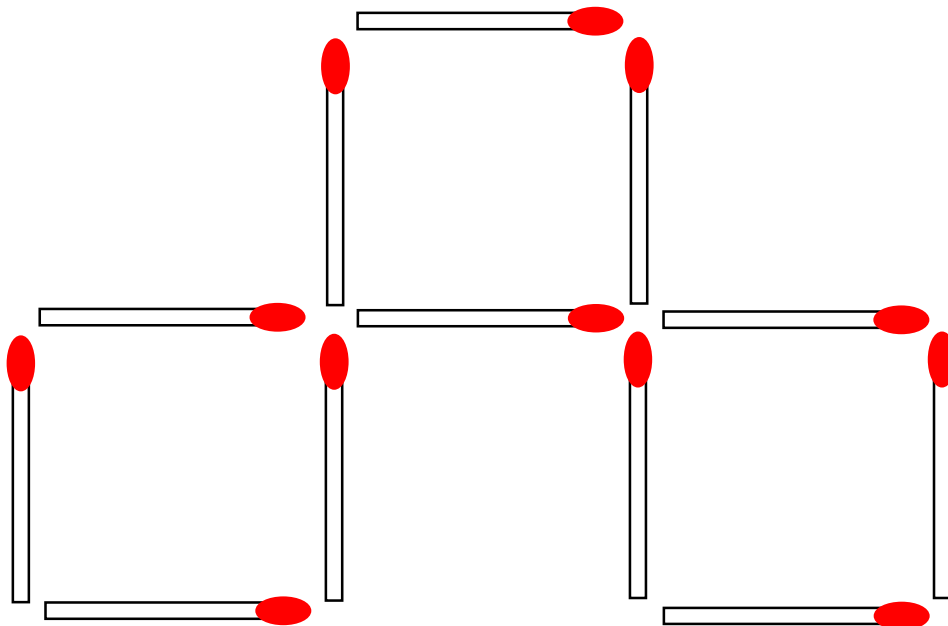

Matchstick puzzle 8 - answer

8. Leave 3

Quite an easy one
this - hope you
managed to do it
without looking at
the solution first!

These matchsticks make superb
stilts - well, if your are not too
big, that is!
