# **1. Introduction**

The Standards and Testing Agency (STA) is responsible for the development and delivery of statutory tests and assessments. STA is an executive agency of the Department for Education.

The 2019 tests assess the national curriculum. This test has been developed to meet the specification set out in the <u>test framework</u><sup>1</sup> for mathematics at key stage 2.

A new test and new mark schemes will be produced each year.

Key stage 2 tests are marked by external markers, who receive training to ensure the published mark schemes are applied consistently and fairly. The mark schemes are provided to show teachers how the tests are marked. The pupil examples are based on responses gathered from the test trialling process.

Scaled score conversion tables are not included in this document. Conversion tables will be produced as part of the standards maintenance process. <u>Scaled score conversion tables</u><sup>2</sup> for the 2019 tests will be published in July 2019. The standards confirmation meeting will take place in June 2019.

# 2. Structure of the test

The test comprises:

- Paper 1: arithmetic (40 marks)
- Paper 2: reasoning (35 marks)
- Paper 3: reasoning (35 marks).

# 3. Content domain coverage

The 2019 test meets the specification in the test framework. Table 1 sets out the areas of the content domain that are assessed in papers 1, 2 and 3.

The references are taken from the test framework. A question assessing 4C7, for example, sets out to 'multiply two-digit and three-digit numbers by a one-digit number using a formal written layout' and is taken from the year 4 programme of study.

## 4. Explanation of the mark schemes

The marking information for each question is set out in the form of tables (sections 7, 8 and 9).

The purpose of the mark scheme is to define the acceptable answers for each question within the test. Answers other than those listed may be acceptable if they meet the marking criteria.

The '**Qu**.' column on the left-hand side of each table provides a quick reference to the question number and part.

The 'Requirement' column may include two types of information:

- a statement of the requirements for the award of each mark, with an indication of whether credit can be given for an appropriate method
- examples of some different types of correct answer.

The 'Mark' column indicates the total number of marks available for each question part.

The '**Additional guidance**' column indicates alternative acceptable answers and guidance, such as the range of acceptable answers, where necessary. This column may also provide details of specific types of answer which are unacceptable. For most questions, however, there will be unacceptable answers that are not listed.

# 5. General marking guidance

#### 5.1 Applying the mark schemes

To ensure consistency of marking, the most frequent procedural queries are listed in section 5.2 along with the action the marker will take. This is followed by further guidance in section 6 relating to marking questions involving money, time and other measures. Unless otherwise specified in the mark scheme, markers will apply these guidelines in all cases.

A small number of general marking principles have been changed this year to clarify the guidance. This does not change the underlying principles or how they are applied.

#### **Recording marks awarded**

Pupils' test papers are scanned so that marking can be conducted on screen by trained markers.

For each question, markers record the award of 3, 2, 1 or 0 marks as appropriate, according to the mark scheme criteria. There is provision in the software to record questions not attempted. The software aggregates marks automatically.

## 5.2 General marking principles

Г

#### Table 2: General marking principles for all papers

1. The answer does not match closely any of the examples given in the mark scheme.	Markers will use their judgement to decide whether the answer corresponds with details in the 'Requirement' column of the mark scheme. Reference will also be made to the 'Additional guidance' column.		
2. The answer is provided in a non-standard way.	Pupils may provide evidence in any form as long as its meaning can be understood. Diagrams, symbols or words are acceptable for explanations or for presenting an answer.		
3. The correct answer or working has been crossed out or erased and not replaced.	The mark(s) will not be awarded for crossed-out or erased answers or working.		
4. More than one answer is given.	If all answers given are correct (or a range of answers is given, all of which are correct), the mark(s) will be awarded unless the mark scheme states otherwise. If both correct and incorrect answers are given, the mark(s) will not be awarded unless the mark scheme states otherwise.		
5. No answer is given in the expected place, but the correct answer is given elsewhere.	Where a pupil has unambiguously indicated the correct answer, the mark(s) will be awarded. In particular, where a word or number is expected, a pupil may meet the requirement by annotating a graph or labelling a diagram elsewhere in the question.		
6. The answer is correct, but the wrong working is shown.	A correct final answer will be awarded the mark(s).		
7. The pupil has used alternative notation	No alternative notation is accepted as representing a decimal point in a number, e.g. a comma.		
for a decimal point in a number.	Refer to section 6 for guidance on marking specific types of question.		
8. The pupil has used a symbol as a thousands separator.	If the pupil has used a comma as a thousands separator (positioned either correctly or incorrectly) and the digits are in the correct order, then the mark(s) will be awarded.		
	If any other symbol, e.g. decimal point or apostrophe, is used, the mark(s) will not be awarded, although method marks may still be available.		

9. The answer in the answer box is wrong	A transcription error occurs when a pupil miscopies their answer from the end of their working into the answer box.	
due to a transcription error.	Each part (integer, numerator, denominator) of a mixed number is considered separately when applying transcription error rules.	
	Where appropriate, detailed guidance will be given in the mark scheme. For questions with no guidance, marks will only be awarded for a transcription error if the wrong answer is due to:	
	<ul> <li>transposed digits in a number (e.g. 243 is written as 324)</li> </ul>	
	OR	
	<ul> <li>one digit changed in a number of 4 or more digits (e.g. 2,345 is written as 2,845).</li> </ul>	
	The mark(s) will not be awarded for any other transcription error including:	
	<ul> <li>a decimal point positioned incorrectly (e.g. 12.34 is written as 1.234 or 1234)</li> </ul>	
	<ul> <li>a change by a power of 10 (e.g. 200 is written as 20 or 2,000)</li> </ul>	
	<ul> <li>a digit added or removed (e.g. 123,456 written as 1233,456 or 12,456)</li> </ul>	
	<ul> <li>a negative sign added or removed.</li> </ul>	
10. The answer is numerically or algebraically equivalent to the	Answers should be given as single values in their simplest form unless the mark scheme states otherwise, e.g. for $$ = 536 – 30, the answer 500 + 6 will not be awarded the mark.	
answer in the mark scheme.	For integer answers, e.g. 20, the answer $\frac{20}{1}$ will be awarded the mark; $\frac{80}{4}$ will not be awarded the mark.	
	For decimal answers that include recurring digit(s), there must be an unambiguous indication of the recurring digit(s). For example, for $\frac{1}{6}$ , 0.16 or 0.16 will be awarded the mark and for $\frac{1}{7}$ , 0.142857 or 0.142857 will be awarded the mark.	
	For fraction answers that can be expressed as a mixed number, the fraction paired with the integer must be a proper fraction, e.g. $1\frac{6}{4}$ will not be awarded the mark although method marks may still be available.	
	Where alternative responses are acceptable, this will be indicated in the 'Additional guidance' column.	

#### Table 3: General marking principles for paper 1 only (arithmetic)

11. The answer in the answer box is wrong due to a misread of numbers given in the question.	Misreads are not allowed in Paper 1; the mark(s) will not be awarded.
12. The pupil has not recorded their working beneath the given long multiplication or	If a pupil carries out their working somewhere on the page other than beneath the given question as expected, then the pupil must start by rewriting the original question in order for it to be considered as a formal method.
long division.	Please note that the operation sign does not need to be given for long multiplication, provided the pupil's working shows the intention to multiply.
13. The answer to the long division question expresses a remainder.	If a pupil reaches an integer answer using a formal method with no more than one arithmetic error, for example 25, then the mark(s) will be awarded for 25 r0 or 25.0, but the mark(s) will not be awarded for an answer of 250
	For answers with a remainder, the remainder must be expressed correctly.
	If a pupil shows a remainder that is the same size as the divisor or larger, for example, a remainder of 28 or 29 when dividing by 28, the mark(s) will not be awarded because the method is incomplete.
	If a pupil reaches a non-integer answer using a formal method with no more than one arithmetic error, for example when dividing by 28, the pupil reaches the answer 6 r14, then the mark(s) will be awarded for $6\frac{14}{28}$ or 6.5, but the mark(s) will not be awarded for 6 $r\frac{14}{28}$ or 6.14 or 614
14. The long division method involves subtracting chunks of different sizes.	If a pupil's formal method involves subtracting chunks, it is not necessary to show a separate addition of the chunks. If the answer is not the correct total for their chunks, then that is treated as one arithmetic error.
	A method is considered as chunking when the size of the chunks are shown alongside the algorithm.
	It should be noted that this method will only be accepted if all chunks are of different sizes.

15. More than one method is given.	If a pupil gives more than one method, then the intended method is taken as the one which leads to the answer in the answer box or an identified answer elsewhere. If no answer is given, then all methods must be appropriate for the method mark(s) to be awarded.			
16. There appears to be a misread of numbers or information given in the question that affects the pupil's working and/or explanation.	This occurs when a pupil misreads a number given in the question and consistently uses a different number that does not alter the original intention or difficulty of the question. For example, if 243 is misread and written as 248, both numbers may be regarded as comparable in difficulty. However, if 243 is misread and written as 245 or 240, the misread number may be regarded as making the question easier. The misread of a number may affect the award of marks. Any misread number must be seen, not implied.			
	Where appropriate, detailed guidance will be given in the mark scheme. If no guidance is given, markers will examine each case to decide whether the mark(s) will be awarded.			
	The mark(s) will not be awarded if:			
	<ul> <li>it is a <b>ONE-mark</b> question</li> <li>there is more than one misread number in a question</li> <li>the mathematics is simplified</li> <li>it is an 'explain' question</li> <li>it is a misread of other information (not numbers)</li> <li>the misread number is the same as any other number in the question.</li> </ul>			
	For <b>TWO-mark</b> questions that have a method mark, one mark will be awarded if an appropriate method is correctly followed through with the misread number to give the correct follow-through answer, provided the mathematics has not been simplified.			
	For <b>THREE-mark</b> questions, refer to the additional guidance.			
17. A misread or an arithmetic error results in an answer with multiple decimal places.	In some instances, a misread or an arithmetic error in a method leads to an answer with one or more decimal places. In such cases, the method mark(s) will be awarded for an answer that is correctly truncated or rounded provided the method is appropriate and the additional guidance does not specify otherwise. For example, 1.2345 is truncated to 1.2			

#### Table 4: General marking principles for papers 2 and 3 only (reasoning)

18. The pupil has reversed values within a calculation involving subtraction or division.	When values within the calculation are reversed, the mark(s) will only be awarded when the answer corresponds to the correct calculation. For example, if the correct calculation is $12 \div 4$ , the method mark(s) may be awarded for $4 \div 12 = 3$ , but not for an answer other than 3 Reversed values within a calculation are not acceptable in 'explain' questions.	
19. The pupil omits an operation sign within their working.	<ul> <li>If the correct sign of +, - , ×, or ÷ for an arithmetic operation is missing, then the mark(s) will only be awarded if the working shown by the pupil is clear enough to indicate that the required operation has been performed. This applies even if the results of the required operation are incorrect. Where carrying or decomposition figures are seen, this is evidence of intention. For example, where the following is seen in working, the layout of the response implies addition or subtraction:</li> <li>456</li> <li>123</li> <li>if the answer is larger than the greater of the given values, e.g. 679, then addition is implied</li> <li>if the answer is less than the first given value, e.g. 323, then subtraction is implied.</li> </ul>	

20. The pupil has used 'an appropriate method'.	For some questions, the mark scheme allows the award of the method mark(s) for 'evidence of an appropriate method', even if the answer is missing or incorrect. Refer to the 'Additional guidance' column where appropriate.		
	For the award of the method mark(s) for an appropriate method, there must be evidence of <b>all</b> the steps of the appropriate method (i.e. any method that would lead to the correct answer if there were no arithmetic errors and no additional steps).		
	This means that, for every step, either:		
	<ul> <li>the appropriate calculation to be carried out must be shown</li> </ul>		
	OR		
	<ul> <li>if the calculation has not been written down, the correct answer or correct follow-through answer must be shown.</li> </ul>		
	Where the calculation shown would lead to a correct final answer, even if the processed numbers do not appear to be taken from the question, a method mark may be awarded unless the mark scheme specifies otherwise.		
21. The pupil has used a trial and improvement	'Trial and improvement' is regarded as an acceptable method, unless the mark scheme states otherwise.		
method.	For a 'trial and improvement' method to be awarded the method mark(s):		
	<ul> <li>there must be at least 3 trials, carried out correctly, which all reduce the range in which the answer is known to lie</li> </ul>		
	<ul> <li>there can be additional trials, which are correctly or incorrectly carried out, and which may not reduce the</li> </ul>		
	<ul><li>range in which the answer is known to lie</li><li>a final answer is not needed, unless the mark scheme</li></ul>		

22. The answer in the answer box is wrong but the correct answer	Extra working occurs when a pupil writes the correct answer in their working, and then continues to process the information further.		
is reached in the working.	When the answer in the answer box is wrong and does not match the answer reached in the working, it is impossible to know why the pupil has written a different answer and it is assumed that extra working has occurred. GMP 9 on transcription errors still applies.		
	If the extra working does not contradict the pupil's appropriate method, the method mark(s) will be awarded.		
	If the extra working contradicts the pupil's appropriate method, the method mark(s) will not be awarded.		
23. The pupil miscopies a value from one part of	There will be instances when a pupil reaches a value in their working, then restarts from a different value.		
their method into the next part.	The mark(s) will not be awarded if:		
	<ul> <li>it is a ONE-mark question</li> </ul>		
	<ul> <li>there is more than one miscopy in the working</li> <li>the miscopy does not follow transcription error rules (see GMP 9).</li> </ul>		
	The method mark(s) will only be awarded if an appropriate method is correctly shown using the miscopied number (which must follow transcription error rules).		
24. The correct answer is embedded in the working.	An embedded answer occurs when a pupil shows the correct answer within their working but then selects the wrong answer from their working as their final answer or leaves the answer box blank. For example, if a pupil shows $2.5 \times 6 = 3 \times 5$ in the last line of their working and writes 5 in the answer box, whereas the correct answer is 3, then this will affect the award of marks.		
	Where appropriate, detailed guidance will be given in the mark scheme. If no guidance is given, markers will examine each case to decide whether the mark(s) will be awarded.		
	For <b>ONE-mark</b> questions, the mark will not be awarded.		
	For <b>TWO-mark</b> questions that have a method mark, one mark will be awarded, provided the pupil does not give redundant extra working that contradicts work already done or which adds to their appropriate method.		
	For <b>THREE-mark</b> questions, refer to the additional guidance.		

25. The phrase 'sight of' is used in the mark scheme.	For some questions, the mark scheme allows the mark(s) to be awarded for sight of a particular number or numbers within a method. Such numbers are the correct answers to partial steps within a method.			
26. The answer correctly follows through from earlier incorrect work.	'Follow-through' marks for an answer will only be awarded when specifically stated in the mark scheme.			
27. The pupil has drawn lines which do not meet at the correct point.	Where the mark scheme states that 'slight inaccuracies in drawing' should be accepted, this means that the mark(s) will be awarded for responses marked within or on a circle of radius 2mm with its centre at the correct point.			
	within the circleon the circleoutside the circle- accepted- accepted- not accepted			

# 6. Marking specific types of question: summary of additional guidance

## 6.1 Answers involving money

	Accept	Do not accept
Where the £ sign is given, e.g.	£3.20 £7 £7.00	
£3.20, £7 £	Any unambiguous indication of the correct amount, e.g. £3.20p £3 20 pence £3 20 £3-20 £3:20 £3:20 £3;20	Incorrect placement of pounds or pence, e.g. £320 £320p Incorrect placement of decimal point or incorrect use or omission of 0 or use of comma as a decimal point, e.g. £3.2 £3.2 £3.200 £32.0 £32.0
		£3,20
Where the p sign is given, e.g. 40p p	40p Any unambiguous indication of the correct amount, e.g. £0.40p 0 40p £0-40p 0:40p £0;40p	Incorrect or ambiguous use of pounds or pence or use of comma as a decimal point, e.g. 0.40p £40p £0,40p

	Accept		Do not ac	cept
Where a unit is not given, e.g. £3.20, 40p	£3.20 320p	40p £0.40 bus indication of	Do not ac Incorrect or ambig of pounds or pend comma as a decin e.g. £320 £320p £3.2	uous use e or use of
	£3;20 3.20 320 3 pounds 20	£.40 0.40 40	3.20p £3,20	0.40p 0,40 £0,40p

## 6.2 Answers involving time

	Aco	cept	Do not	accept
A time interval, e.g.	2 hours 30 min	utes		
2 hours 30 minutes	Any unambiguo indication, e.g.	ous, correct	Incorrect or am interval or use of decimal point, of	of comma as a
	(0)2 h 30 150 minutes		2.30	230
	(0)2h 30min 150		2.3	2.30 min
	(0)2 30 2.5 hours		2.3 hours	2,5 hours
	(0)2-30 2 <sup>1</sup> / <sub>2</sub> hours		2.3h	2,30
	Digital electronic time, e.g. (0)2:30 (0)2;30		2h 3	1 h 90 min

	Accept	Do not accept
A specific time, e.g.	(0)8:40 am	
8:40 am, 17:20	(0)8:40	
	twenty to nine	
	Any unambiguous, correct	Incorrect time, e.g.
	indication, e.g.	8.4 am
	(0)8.40	8.40 pm
	(0)8;40	Incorrect placement of
	0840	separators, spaces, etc. or
	(0)8 40	incorrect use or omission of 0 or use of a comma as a
	(0)8-40	decimal point, e.g.
	Unambiguous change to	840
	12 or 24-hour clock, e.g.	8:4:0
	17:20 as 5:20 pm or 17:20 pm	8.4
		084
		8,40

## 6.3 Answers involving measures

	Accept	Do not accept
Where units are given, e.g. 8.6 kg kg m	8.6 kg Any unambiguous indication of the correct measurement, e.g. 8.60 kg 8.6000 kg 8 kg 600 g	Incorrect or ambiguous use of units or use of comma as a decimal point, e.g. 8600 kg 8 kg 600
		8,60 kg 8,6000 kg

If a pupil gives an answer with a unit different from the unit in the answer box, then their answer must be equivalent to the correct answer provided, unless otherwise indicated in the mark scheme.

If a pupil leaves the answer box empty but writes the answer elsewhere on the page without any units, then that answer is assumed to have the units given in the answer box, subject to the conditions listed above.

# 7. Mark schemes for Paper 1: arithmetic

Qu.	Requirement	Mark	Additional guidance
1	6,090	1m	
2	8,357	1m	
3	20	1m	
4	336	1m	
5	369	1m	
6	8.993	1m	
7	60	1m	
8	10	1m	
9	0	1m	
10	13	1m	
11	22	1m	<b>Do not</b> accept –22
12	8	1m	
13	110	1m	
14	253.4	1m	
15	10	1m	
16	27	1m	
17	101,000	1m	
18	600	1m	Do not accept 600%
19	4.75	1m	
20	0.009	1m	
21	7.1	1m	
22	<u>6</u> 7	1m	Accept equivalent fractions or an <b>exact</b> decimal equivalent, e.g. 0.857142 (accept any unambiguous indication of the recurring digits). <b>Do not</b> accept rounded or truncated decimals.

Qu.	Requirement	Mark	Additional guidance
23	Award <b>TWO</b> marks for the correct answer of 22,572	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for a formal method of long multiplication with no more than <b>ONE</b> arithmetic error, e.g. • 836 $\times \frac{27}{5852}$ $\frac{16720}{22602}$ (error) <b>OR</b>		Working must be carried through to reach a final answer for the award of <b>ONE</b> mark. <b>Do not</b> award any marks if the error is in the place value, e.g. the omission of the zero when multiplying by tens: $836 \times \frac{27}{5852} = 1672$ (place value error)
	• 836 × 27 5612 (error) 16720 22332		7524
24	<u>19</u> 20	1m	Accept equivalent fractions or an <b>exact</b> decimal equivalent, e.g. 0.95

Qu.	Requirement	Mark	Additional guidance
25	Award <b>TWO</b> marks for the correct answer of 24	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for the formal methods of division with no more than <b>ONE</b> arithmetic error, i.e.		Working must be carried through to reach a final answer for the award of <b>ONE</b> mark.
	long division algorithm, e.g.		
	$ \begin{array}{r}     23 r29 \\     37 \overline{)888} \\     - \underline{740} \\     140 (error) \\     - \underline{111} \\     29 \\ \end{array} $		
	OR		
	$ \begin{array}{r}     42 (error) \\ 37 888 \\     - 740 \\     148 \\     - 148 \\     0 \\ \end{array} $ $ \begin{array}{r}     20 \times 37 \\     4 \times 37 \\     0 \end{array} $		
	<ul> <li>short division algorithm, e.g.</li> <li>2 3 r27 (error)</li> <li>37 88<sup>14</sup>8</li> </ul>		Short division methods <b>must</b> be supported by evidence of appropriate carrying figures to indicate the use of a division algorithm, and be a complete method. The carrying figure <b>must</b> be less than the divisor.
26	3 <u>3</u> 0 <b>R</b>	1m	Accept equivalent mixed numbers, fractions or an <b>exact</b> decimal equivalent, e.g. 3.3
	<u>33</u> 10		
27	112	1m	Do not accept 112%
28	<u>23</u> 36	1m	Accept equivalent fractions or an <b>exact</b> decimal equivalent, e.g. 0.638 (accept any unambiguous indication of the recurring digits).
			<b>Do not</b> accept rounded or truncated decimals.
29	459	1m	Do not accept 459%

Qu.	Requirement	Mark	Additional guidance
30	Award <b>TWO</b> marks for the correct answer of 215,016	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for the formal method of long multiplication with no more than <b>ONE</b> arithmetic error, e.g. • $3468$ $\times \frac{62}{6936}$ 208080 214016 (error) <b>OR</b> • $3468$ $\times \frac{62}{6934}$ (error) 208080 215014		Working must be carried through to reach a final answer for the award of <b>ONE</b> mark. <b>Do not</b> award any marks if the error is in the place value, e.g. the omission of the zero when multiplying by tens: • $3468$ $\times \frac{62}{6936}$ $\frac{20808}{27744}$ (place value error) $\frac{27744}{27744}$
31	<u>2</u> 9	1m	Accept equivalent fractions or an <b>exact</b> decimal equivalent, e.g. 0.2 (accept any unambiguous indication of the recurring digits). <b>Do not</b> accept rounded or truncated decimals.
32	$1\frac{3}{4}$ <b>OR</b> $\frac{7}{4}$	1m	Accept equivalent mixed numbers, fractions or an <b>exact</b> decimal equivalent, e.g. 1.75
33	162	1m	Do not accept 162%

Qu.	Requirement	Mark	Additional guidance
34	$17\frac{1}{2}$ OR	1m	Accept equivalent mixed numbers, fractions or an <b>exact</b> decimal equivalent, e.g. 17.5
	$\frac{70}{4}$ OR $\frac{35}{2}$		
35	450	1m	
36	Award <b>TWO</b> marks for the correct answer of 97	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for the formal methods of division with no more than <b>ONE</b> arithmetic error, i.e. • long division algorithm, e.g. $\frac{96 \text{ r82}}{83 8051}$ $-\frac{7470}{580 (error)}$ $-\frac{498}{82}$ <b>OR</b> • $\frac{47 (error)}{83 8051}$ $-\frac{4150}{3901} 50 \times 83$ $\frac{3901}{581}$ $-\frac{3320}{581} 40 \times 83$		Working must be carried through to reach a final answer for the award of <b>ONE</b> mark.
	0 • short division algorithm, e.g. 9 6 r73 $83 805^{57}1$ <i>(error)</i>		Short division methods <b>must</b> be supported by evidence of appropriate carrying figures to indicate the use of a division algorithm, and be a complete method. The carrying figure <b>must</b> be less than the divisor.

# 8. Mark schemes for Paper 2: reasoning

Qu.	Requirement							Mark	Additional guidance
1	Award <b>ONE</b> mark for three correct answers, as shown:				ct ansv	vers,	1m		
		4	×	8	=	32			
		×		×					
		3	×	7	=	21			
		=		=					
		12		56

3		<b>ONE</b> ned cor				mbers		1m	Lines need not touch the numbers and ordinals, provided the intention is clear.
	1,00	9,909			15	<sup>st</sup> larç	gest		<b>Do not</b> accept any number which has been matched to more than one ordinal.
	1,023,065 2 <sup>nd</sup>			1,023,065					
	1,009,099 3rd					rd			
	1,230,650 4 <sup>th</sup> smallest						allest		

Qu.	Requirement	Mark	Additional guidance
4	Diagram completed, as shown:	1m	Accept slight inaccuracies in drawing (see page 13 for guidance).
	i i i i i i i i i i i i i i i i i i i		Shape need not be shaded for the award of <b>ONE</b> mark.
5	Award <b>TWO</b> marks for three correct numbers, as shown:	Up to 2m	<b>Do not</b> accept misreads for this question.
	<b>110</b> 155 200 245 <b>290 335</b>		
	Award <b>ONE</b> mark for:		
	<ul> <li>any two numbers correctly placed</li> </ul>		
	OR		
	<ul> <li>if box 1 is correct, accept correct follow-through for box 3 from the incorrect value in box 2.</li> </ul>		
6	10	1m	
7	2.5 or $2\frac{1}{2}$	1m	Refer to section 6.3 on page 16 for additional guidance on marking answers involving measures.
8a	11 written in the first box, as shown:	1m	
	<b>11</b> 25 53		
8b	109 written in the last box, as shown:	1m	
	25 53 <b>109</b>		
9	Award <b>TWO</b> marks for the correct answer of 124	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for evidence of an appropriate method, e.g.		Answer need not be obtained for the award of <b>ONE</b> mark.
	• 953 - 85 = 868 868 ÷ 7		If the pupil's evaluation contradicts the appropriate method, the method mark will not be awarded.

Qu.	Requirement	Mark	Additional guidance
10	Second box only ticked correctly, as shown:	1m	Accept alternative unambiguous positive indication of the correct answer, e.g. Y.
	number of tickets × 3 + 24		
	number of tickets $\times$ 24 + 3		
	number of tickets + 3 × 24		
	number of tickets + 24 × 3		
11a	0.25	1m	<b>Do not</b> accept $\frac{1}{4}$ or any other fraction.
			Refer to section 6.3 on page 16 for additional guidance on marking answers involving measures.
11b	65(p) <b>OR</b> (£)0.65	1m	Refer to section 6.1 on pages 14 and 15 for additional guidance on marking answers involving money.
12	Both symbols correct, as shown:	1m	
	<u>7</u> 10 ► 0.07		
	23 1000 < 0.23		

Qu.	Requirement			Mark	Additional guidance
13	Award <b>TWO</b> mark that has <b>all</b> of the		•	Up to 2m	Accept drawings where any side has been extended past a vertex.
	for the angle				When considering whether the triangle is completed, <b>do not</b> accept:
	for the right a	•			<ul> <li>a quadrilateral or another shape drawn</li> </ul>
	•	as been drawr her on the giver			OR
	constructed	, provided they both angles wi	thin the		<ul> <li>a curved line that is used to complete the shape</li> </ul>
		the line 7.9cm			OR
	If the answer is in for a completed to points correct.	•			<ul> <li>sides not meeting to form a vertex.</li> </ul>
14	Award <b>TWO</b> mark of the three numb			Up to 2m	<b>Do not</b> accept 9,000 or 500 for the second and third entries.
		Round 39,476			
	to the nearest 10,000	40,000			
	to the nearest 1,000	39,000			
	to the nearest 100 <b>39,500</b>				
	If the answer is in mark for <b>any two</b> correctly.	,			
15	25			1m	
16	4			1m	

Qu.	Requirement	Mark	Additional guidance
17	Award <b>TWO</b> marks for the correct answer of 144	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for evidence of an appropriate method, e.g.		Answer need not be obtained for the award of <b>ONE</b> mark.
	<ul> <li>8 × 6 = 48</li> <li>48 ÷ 4 = 13 (error)</li> <li>13 × 13 = 169</li> </ul>		
	OR		
	Award <b>ONE</b> mark for:		
	• evidence for the side length of the square calculated correctly, i.e. 12		
18	Award <b>ONE</b> mark for a correct explanation of	1m	No mark is awarded for circling '89' alone.
	<ul> <li>why the 95 AND 87 are NOT prime, e.g.</li> <li>87 is divisible by 3 and/or 29 AND 95 is</li> </ul>		Both non-primes must be explained
	divisible by 5 and/or 19		correctly for the award of the mark.
	<ul> <li>87 is in the 3 times table AND 95 is in the 5 times table</li> </ul>		<b>Do not</b> accept vague or incomplete explanations, e.g.
	• 95 is divisible by five because every		The other 2 numbers have more than
	number in the five times table ends in five or zero. 87 is divisible by three		<ul><li>2 factors (vague)</li><li>87 is divisible by 3 (incomplete).</li></ul>
	because 9 is in the three times table so		<b>Do not</b> accept explanations which
	<ul> <li>is ninety. Ninety minus three is 87</li> <li>8 + 7 = 15 and 15 is divisible by 3 AND</li> </ul>		include incorrect mathematics or
	95 is divisible by 5		incorrect information that is relevant to the explanation, e.g.
			• 3 × 27 = 87
			89 has three factors
			no numbers go into 89

Qu.	Requirement	Mark	Additional guidance
19	Award <b>TWO</b> marks for the correct answer of 3.75	Up to 2m	Accept for <b>TWO</b> marks, 3,750ml for final answer in working and the answer box blank <b>OR</b> 3,750 in the answer box where the litres has been replaced with millilitres.
	If the answer is incorrect, award <b>ONE</b> mark for evidence of an appropriate method, e.g. • 60 ÷ 4 = 15		Accept for <b>ONE</b> mark 3,750 litres (I) in the answer box <b>OR</b> the final answer in working and answer box blank.
	250 × 15 = 3750 3750 ml ÷ 1000 =		Answer need not be obtained for the award of <b>ONE</b> mark.
	OR		
	<ul> <li>250 ÷ 4 = 62.5 ml per second</li> <li>62.5 × 60 = 3750</li> <li>3750 ml ÷ 1000 =</li> </ul>		
	OR		
	<ul> <li>60 ÷ 4 = 15, so there are 15 lots of 4 seconds in 1 minute so there are 15 bottles per minute. There are 4 bottles in 1 litre 15 ÷ 4 =</li> </ul>		
20	Award <b>TWO</b> marks for two boxes ticked correctly, as shown:	Up to 2m	Accept alternative unambiguous positive indication of the correct answer, e.g. Y.
	$\frac{1}{20}$		
	<u>20</u> 40		
	$\frac{1}{5}$		
	$\frac{3}{15}$		
	2 100		
	If the answer is incorrect, award <b>ONE</b> mark for:		
	<ul> <li>only one box ticked correctly and no incorrect boxes ticked</li> </ul>		
	<ul> <li>two boxes ticked correctly and one incorrect box ticked.</li> </ul>		

Qu.	Requirement	Mark	Additional guidance
21	Rectangle divided, as shown:	1m	Accept slight inaccuracies in drawing provided the intention is clear.
	OR		
	OR		
	OR		

Qu.	Requirement	Mark	Additional guidance
22a	<u>2</u> 5	1m	Accept equivalent fractions and decimals e.g. $\frac{4}{10}$ and 0.4
22b	Award <b>TWO</b> marks for the correct answer of 10.7	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for evidence of an appropriate method, e.g.		Answer need not be obtained for the award of <b>ONE</b> mark.
	• 8.1 + 9.3 + 11.9 + 11.8 + 12.4 = 53.5 53.5 ÷ 5		Any correct rounding or truncating does not negate an appropriate method. Any value which does not result from correct rounding or truncating implies an additional step not shown.
23	Award <b>TWO</b> marks for the correct answer of 720	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for evidence of an appropriate method, e.g.		Answer need not be obtained for the award of <b>ONE</b> mark.
	<ul> <li>3 × 4 × 6 = 72</li> <li>8 × 9 × 11 = 792</li> <li>792 - 72 =</li> </ul>		
	Award <b>ONE</b> mark for sight of 792		

# 9. Mark schemes for Paper 3: reasoning

Qu.	Requirement	Mark	Additional guidance
1	£7,899	1m	Refer to section 6.1 on pages 14 and 15 for additional guidance on marking answers involving money.
2a	7	1m	<b>Do not</b> accept 70,000 or 70 thousands.
2b	4,000,000	1m	Accept 4 million or four million <b>Do not</b> accept the answer 4
3	Award <b>ONE</b> mark for the correct box ticked, as shown: $10 + a$ $10 \div a$ $a - 10$ $10 - a$ $a \times 10$	1m	Accept alternative unambiguous positive indication of the correct answer, e.g. Y.
4	Masses in correct order, as shown: 0.009 kg 0.99 kg 1.025 kg 1.25 kg lightest	1m	All masses must be in the correct order for the award of <b>ONE</b> mark. Accept for <b>ONE</b> mark the masses written in reverse order <b>AND</b> the label lightest has been changed to follow suit. Misreads and transcription errors are <b>not</b> allowed.
5	Addition completed, as shown <b>1</b> 2 <b>8</b> + <b>7</b> 2 = $2 0 0$	1m	All numbers must be correct for the award of the mark.

Qu.	Requirement		Ма	rk	Additional guidance
6	Award <b>TWO</b> marks fo £6.87	r the correct answer of	of Up 2n		
	If the answer is incorr for evidence of an ap				Answer need not be obtained for the award of <b>ONE</b> mark.
	<ul> <li>£1.49 + £1.64 = \$ £10 - £3.13 =</li> <li>OR</li> </ul>	23.13			Accept for <b>ONE</b> mark an answer of £687 <b>OR</b> £687p as evidence of an appropriate method.
	• £10 - £1.49 = £8 £8.51 - £1.64 =	.51			Refer to section 6.1 on pages 14 and 15 for additional guidance on marking answers involving money.
	<b>OR</b> • £10 – 164p – 145	9b =			answers involving money.
7a	155		1n	n	
7b	Table completed with as shown:	three correct number	rs, <b>1n</b>	n	All three numbers must be correct for the award of the mark.
	Mass in g	Number of kittens			<b>Do not</b> accept tally marks on their own.
	250–299	2			
	300–349	3			
	350–399	2			
	400–449	1			
8	Award <b>TWO</b> marks fo of 1,356	r the correct answer	Up 2n

	<ul> <li>4289 + 355 = 464</li> <li>6000 - 4644 =</li> </ul>	14			
	<b>OR</b> • 6000 - 4289 - 35	5 =			
	<b>OR</b> • 6000 – 4289 = 17 1711 – 355 =	711			

Qu.	Requirement	Mark	Additional guidance
9	2,250	1m	<b>Do not</b> accept $2000\frac{1}{4}$ <b>OR</b> $2\frac{1}{4}$ <b>OR</b> 2.25
10a	Quadrilateral completed, as shown:	1m	Accept slight inaccuracies in drawing provided the intention is clear. (See page 13 for guidance.)
10b	Quadrilateral translated correctly, as shown:	1m	Accept slight inaccuracies in drawing provided the intention is clear. (See page 13 for guidance.) Award <b>ONE</b> mark if the answer to (b) is a quadrilateral with sides drawn and is a correct translation of their answer to (a).

Qu.	Requirement	Mark	Additional guidance
11	Award <b>TWO</b> marks for all four given numbers placed completely correctly 7 times, as shown:	Up to 2m	Accept the numbers in any order. Ignore any additional numbers not given in the question.
	Prime numbersFactors of 12Factors of 15235		
	If the answer is incorrect, award <b>ONE</b> mark for three of the given numbers all placed completely correctly, e.g.		
	Prime numbersFactors of 12Factors of 15235		
	OR		
	Prime numbersFactors of 12Factors of 152356		
	OR		
	Prime numbers 2 3 Factors of 12 2 3 4 6 Factors of 15 3 5		

Qu.	Requirement	Mark	Additional guidance
12	Award <b>ONE</b> mark for two correct answers, as shown: length = <b>19 cm</b> width = <b>9.1 cm</b>	1m	Refer to section 6.3 on page 16 for additional guidance on marking answers involving measures.
13	<ul> <li>An explanation that includes a correct counter example, e.g.</li> <li>When you double 10° it is not obtuse</li> <li>2 × 27° = 54°</li> <li>Double 45° is a right angle not obtuse</li> <li>OR</li> <li>An explanation that demonstrates where the statement in the question is not correct, e.g.</li> <li>If the acute angle is less than 45° then doubling it will be less than 90°, so it won't be obtuse (more than 90°).</li> </ul>	1m	<ul> <li>Do not accept vague or incomplete explanations, e.g.</li> <li>Sometimes it will be acute</li> <li>Some acute angles are half an obtuse angle, but not all</li> <li>When you double an acute angle, you get a right angle</li> <li>Do not accept explanations which include incorrect mathematics or incorrect information that is relevant to the explanation, e.g.</li> <li>20°C × 2 = 40°C</li> <li>20% x 2 = 40%</li> </ul>
14	91	1m	
15	400	1m	

Qu.	Requirement	Mark	Additional guidance
16	Award <b>TWO</b> marks for the correct answer of £1.85	Up to 2m	<b>Do not</b> accept misreads for this question.
	If the answer is incorrect, award <b>ONE</b> mark for evidence of an appropriate method, e.g.		Answer need not be obtained for the award of <b>ONE</b> mark.
	• $1\frac{1}{2} \times \pounds 1.50 = \pounds 2.25$ $\frac{1}{2}$ of £1.80 = 70p (error)		Accept for <b>ONE</b> mark an answer of £185 or £185p as evidence of an appropriate method.
	$\pounds$ $\pounds$ 2.25 + 70p = $\pounds$ 2.95 $\pounds$ 5 - $\pounds$ 2.95 = <b>OR</b>		Refer to section 6.1 on pages 14 and 15 for additional guidance on marking answers involving money.
	• $\pounds 1.50 + 75 = \pounds 2.25$ $\pounds 2.25 + 90 = 415p$ (error) $\pounds 5.00 - 415p =$		
	OR		
	<ul> <li>sight of £3.15 OR 315p as evidence of evaluating the correct cost of the potatoes and carrots.</li> </ul>		
17	Award <b>ONE</b> mark for any pair of whole numbers less than 10 that satisfy the equation, i.e.	1m	
	<i>x</i> = 8 <b>AND</b> <i>y</i> = 6		
	OR		
	<i>x</i> = 6 <b>AND</b> <i>y</i> = 7		
	OR		
	<i>x</i> = 4 <b>AND</b> <i>y</i> = 8		
	OR		
	<i>x</i> = 2 <b>AND</b> <i>y</i> = 9		

Qu.	Requirement	Mark	Additional guidance
18	Award <b>TWO</b> marks for three boxes ticked correctly, as shown:	Up to 2m	Accept alternative unambiguous positive indication of the correct answer, e.g. Y.
	$\frac{1}{2}$		
	$\frac{2}{8}$		
	$\frac{3}{4}$		
	$\frac{7}{16}$		
	$\frac{24}{32}$		
	Award <b>ONE</b> mark for:		
	<ul> <li>only two boxes ticked correctly and no incorrect boxes ticked</li> </ul>		
	OR		
	<ul> <li>three boxes ticked correctly and one incorrect box ticked.</li> </ul>		

Qu.	Requirement	Mark	Additional guidance
19	Award <b>THREE</b> marks for the correct answer of 7,174 If the answer is incorrect, award <b>TWO</b> marks for: • evidence of an appropriate complete method which contains no more than one arithmetic error, e.g. $\frac{53}{\times \frac{68}{3504}} \frac{105}{\times \frac{34}{3570}}$ 3,504 + 3,570 = 7,074 Award <b>ONE</b> mark for: • evidence of an appropriate method with more than one arithmetic error. <b>OR</b> • sight of 3,604 as evidence of long multiplication step (68 × 53) completed correctly. <b>OR</b> • sight of 3,570 as evidence of long multiplication step (105 × 34) completed correctly.	Up to 3m	Answer need not be obtained for the award of <b>ONE</b> mark. A misread of a number may affect the award of marks. No marks are awarded if there is more than one misread or if the mathematics is simplified. <b>TWO</b> marks will be awarded if an appropriate method with the misread number is followed through correctly. <b>ONE</b> mark will be awarded for evidence of an appropriate method with the misread number followed through correctly with no more than one arithmetic error.

Qu.	Requirement	Mark	Additional guidance
20	Award <b>TWO</b> marks for the correct answer of 29	Up to 2m	
	If the answer is incorrect, award <b>ONE</b> mark for evidence of an appropriate method, e.g.		Answer need not be obtained for the award of <b>ONE</b> mark.
	<ul> <li>2 × 500 = 1,000 1,000 ÷ 34 =</li> </ul>		Answer does not need to have been rounded or rounded correctly for the award of <b>ONE</b> mark.
	• $2 \times 500 \div 34 =$ • $500 \div 34 = 14 \text{ r}23 \text{ (error)}$ $14 \text{ r}23 \times 2 = 28 \text{ r}46$ OR • $34 \times 10 = 340$ $34 \times 30 = 1,020$ Answer = 30 booklets (error)		If a pupil reaches a non-integer answer, for example 28 r2 and expresses it as 28.2 without further working, this is considered a notation error and is condoned. Within an appropriate method, if the pupil's remainder from 500 divided by 34 is less than 17 and this remainder is ignored before doubling, this is acceptable for <b>ONE</b> mark. If the pupil's remainder is 17 or more and it has been ignored before doubling, this is <b>not</b> acceptable for <b>ONE</b> mark.
			<b>Do not</b> accept a trial and improvement method.
21a	Award <b>ONE</b> mark for <b>B</b> is (55, 30)	1m	
21b	Award <b>ONE</b> mark for	1m	
	<b>D</b> is (55, 14)		
	If B and D are incorrect, <b>ONE</b> mark may be given for the correct $y$ coordinate for both B and D and the same $x$ coordinate (incorrect) for both points, i.e.		
	• D is (same <i>x</i> as B, 14)		
22	10.5 (cm)	1m	Accept $10\frac{1}{2}$

Qu.	Requirement	Mark	Additional guidance
23	<ul> <li>An explanation that gives the correct values for PQ and/or QR, e.g.</li> <li>PQ = 640m</li> <li>QR is 160, 160 times 4 is not 600m</li> </ul>	1m	<ul> <li>Do not accept vague, incomplete or incorrect explanations, e.g.</li> <li>Olivia is not correct because you can't divide 600 by 4 like you can for 800</li> <li>Do not accept explanations which</li> </ul>
	640 160 P Q R OR		include incorrect mathematics or incorrect information that is relevant to the explanation.
	An explanation recognising PR is 800m and must be 5 times QR, e.g.		
	<ul> <li>the total distance is 800m. Divide by 5 to give 160 for distance between Q and R, so P and Q is 4 × 160 = 640m (not 600m)</li> <li>if QR is 200m, then PR is 1000m not 800m</li> <li>if PQ is 600m then QR is 800 - 600 = 200m. Then PR is 5 × 200 = 1000m but it is only 800m.</li> </ul>		
	OR		
	<ul> <li>An explanation that PQ is not 600m, e.g.</li> <li>if it was 600m then the shorter distance would be 200m if added to make 800m, 600m is 3 times 200, not 4 times</li> <li>Olivia is not correct because 600 ÷ 4 = 150 and 600 + 150 doesn't equal 800</li> <li>Olivia is not correct because 800 - 600 = 200 and 600 is not 4 times 200</li> </ul>
